## WORKBC TRAINING GRANTS - STREAM 3

The B.C. Employer Training Grant program (ETG) supports skills training to address provincial labour market needs. The program is delivered by the Province of British Columbia and is funded by the Government of Canada through the Workforce Development Agreement (WDA).

**Stream 3: Technical Training Stream** supports employers to train current or new employees in technical skills in response to automation and other technological advancements. Technical training is defined as:

- training to develop new skills required to operate machinery, equipment or use software, an application or program. This includes computer programming, or
- training needed for the successful adoption of new technological systems, including new manufacturing, production and construction methods.

At the time of application, participants must be unemployed or employed by the applicant employer, and employers must have a job for the participant at their company once training is completed.

Applications approved under this stream may receive 80 percent of eligible training costs, up to a maximum of \$10,000 per participant. The employer is required to contribute the remaining 20 percent.
